DevPulse API

API Specification

Version: 1.0
Status: Draft
Document Type: API Specification
API Style: RESTful JSON API
Related Documents: - 01-software-requirements.md - 02-software-architecture.md - 04-database-design.md - 06-api-standards.md

---

1. Purpose

تحدد هذه الوثيقة جميع واجهات REST API الخاصة بالمشروع، وتشكل العقد (API Contract) بين الـ Backend وجميع العملاء (Clients).

يجب أن يوثق هنا أولاً Response أو Request أو Endpoint أي تعديل على.

---

2. API Overview

Base URL

```
/api/v1
```

Content Type

```
Content-Type: application/json
Accept: application/json
```

Authentication

يستخدم النظام:

```
Bearer Token
```

المصدر:

Laravel Sanctum

---

3. API Modules

Module	Prefix
Authentication	/auth
Users	/users
Posts	/posts
Categories	/categories
Tags	/tags
Comments	/comments
Media	/media

---

4. Authentication API

Register

```
POST /auth/register
```

Purpose

إنشاء حساب جديد.

Authentication

❌

Request

```
{
  "name": "John Doe",
  "email": "john@example.com",
  "password": "********",
  "password_confirmation": "********"
}
```

Success

```
201 Created
```

Response

```
{
  "success": true,
  "message": "User registered successfully.",
  "data": {
    "token": "...",
    "user": {}
  }
}
```

Login

```
POST /auth/login
```

Authentication

❌

Logout

```
POST /auth/logout
```

Authentication

✅

---

5. Posts API

List Posts

```
GET /posts
```

Authentication

Optional

Supports

- Pagination
- Filtering
- Search

• Sorting

Show Post

```
GET /posts/{id}
```

Create Post

```
POST /posts
```

Authentication

Required

Update Post

```
PUT /posts/{id}
```

Authorization

Owner or Admin

Delete Post

```
DELETE /posts/{id}
```

Authorization

Owner or Admin

---

6. Categories API

Method	Endpoint
GET	/categories
POST	/categories

Method	Endpoint
GET	/categories/{id}
PUT	/categories/{id}
DELETE	/categories/{id}

---

7. Tags API

Method	Endpoint
GET	/tags
POST	/tags
GET	/tags/{id}
PUT	/tags/{id}
DELETE	/tags/{id}

---

8. Comments API

Method	Endpoint
POST	/comments
PUT	/comments/{id}
DELETE	/comments/{id}

---

9. Media API

Upload

```
POST /media
```

Purpose

رفع ملف مرتبط بمقال.

Authentication

Required

10. Common Query Parameters

Pagination

```
?page=1
&per_page=15
```

Search

```
?search=laravel
```

Sorting

```
?sort=created_at
&direction=desc
```

Filtering

مثال

```
?category=backend
```

---

11. Status Codes

Code	Meaning
200	OK
201	Created
204	No Content
400	Bad Request
401	Unauthorized
403	Forbidden

Code	Meaning
404	Not Found
409	Conflict
422	Validation Error
500	Internal Server Error

---

12. Versioning Strategy

الإصدار الحالي:

```
v1
```

أي تغيير يكسر التوافق (Breaking Change) يتطلب إصدارًا جديدًا.

---

13. API Lifecycle

كل Endpoint يمر بالمراحل التالية:

```
Requirement
↓
API Design
↓
Validation
↓
Authorization
↓
Implementation
↓
Testing
↓
Documentation
↓
Release
```

---

14. API Review Checklist

قبل اعتماد أي Endpoint:

- هل يتبع REST؟
- هل الاسم صحيح؟
- هل يستخدم Resource مناسب؟
- هل يستخدم Form Request؟
- هل توجد Policy؟
- هل تمت كتابة Feature Test؟
- هل تم توثيقه في Scribe/OpenAPI؟

---

15. Future API Extensions

الإصدار الحالي يسمح بإضافة:

- Notifications API
- Favorites API
- Followers API
- Search API
- Analytics API

دون كسر الـ API الحالي.

---

16. Revision History

Version	Date	Description
1.0	2026-07-21	Initial API Specification
